Insurance Against Depression

A newspaper published on the Pacific Coast prints the following note received by it from a worker in lumber camps: "You need not worry about me. I have worked many years in the logging camps, saved my earnings. Now, during the depression, I am able to get along on three meals a day and a good place to sleep. I am a naturalized citizen. I will vote for the things that are right."

Commenting on this statement, a magazine writer says it would be difficult to condense the principles of sound economics and good citizenship into smaller space. Let us analyze it a bit.

In the years when work was plentiful this industrious woodsmen, like many others, worked hard to earn his living. But for the past seven years had alternated with the known history of "depression." They did not in Egypt in the days of Joseph, when amid the suffering of the masses he stored up grain during seven fat years as insurance against the succeeding seven lean years. Ordinary prudence told this Pacific Coast woodsmen that in storing up the grain of the fat years he, too, would be able to meet the deficiency in the lean years.

This woodsmen had nothing but his labor to sell, so he sold it at a profit when the market was brisk and saved the profit to provide for his needs when the market should be dull. And "depression" finds him living comfortably and free from worry. He can afford to wait in philosophical patience for the advent of another period of fat years.

And after all, who are we to say that he is really differently situated than is this woodsmen? What, in the final analysis, has any person to sell but his or her labor? And having sold that labor in times when it is in demand and will pay for, whether in wages, or profitable production, from farms, or timber or in business, it only is the sound sensible policy, in fact the duty, of the laborer to save against the day when there comes a decline in demand for his services and a resultant decline or stoppage to current income or profit.

Everybody, but the short-sighted, the thoughtless, the carefree, the servile today against sickness, accident death and old age. These insure their health, medicines and belongings against possible loss by fire or other catastrophe. They regard these steps as not only wise, but a duty they owe to themselves and their families. In like manner, is it not the part of wisdom, and a duty, in the fat years of earning power to "save" against the lean years of depression?

In all the young, and easy, and speeches, and editorials, and articles, that have been written or spoken on economic topics, in all the speculations as to causes and cures for the present "depression," can any one find a sure specific for economic comfort and independence than that offered by this hard-headed, straight-thinking woodsmen. Out of the abundant fat years he has stored up, saving against the lean years. It is simply the old, classic preventive of Industry and Thrift properly balanced. And whenever it has been applied it has worked.

Think Salaries Too Low

Civil Service Federation Holds Wages Paid Are Inadequate

Holding that the civil service salaries are inadequate, the Civil Service Federation of Canada, at its opening session of its 12th annual convention in Ottawa, considered the report of its executive committee outlining plans for continued efforts to secure more adequate pay through out the government. The executive reported a special preparation of the case for the service for higher pay to be laid before the Heavy Royal Commission.

When a man has nothing to do, he always attends to it personally.

TO IMPROVE YOUR APPETITE

Feeling indifferently? Out of sorts? Depressed? Stimulate your digestive tract with Dr. Borden's Chocolate Malted Milk. It's rich and creamy, with a real MALT flavor. It's a great drink for breakfast. Buy a bag of Borden's Chocolate Malted Milk at your dealer. It's a pound and half pound size.

CARTERS HERB PILLS

W. N. U. 1893

Canada's Automobile Output Is Higher

At End Of April Production Showed Substantial Increase

Automobile production shot upward in Canada during April. With a total output of 17,169 cars, the daily average of car makers was 37 per cent higher than in March, although only about one-half the month was available.

The index number of production computed by the Dominion Bureau of Statistics, which started the new year at 60 per cent, below normal, was at the end of April only 26 per cent below normal.

Believed In Advertising
Over in England, in the village cemetery of Dagenham, Essex, stands a tombstone on which this bit of advertising is inscribed:

"Here lies John Steers, who when living brevred good beer. Turn to the right, go down the hill; his son keeps up the business still."

New Aid For The Alpinist
The great attraction of Jasper National Park in Alberta to alpine climbers is no doubt the opportunity it affords for first ascents. There are many important peaks still unclimbed and even unnamed and whole regions waiting to be explored.

Inter-Provincial Traffic Council

Saskatoon Board Of Trade Voices Opposition To Proposed Plan

Opposition to the proposed prairie provinces inter-provincial traffic council was expressed as an executive decision of the Saskatoon Board of Trade. The decision was expressed that it would not be in the best interests of Saskatoon and Saskatchewa

Credit Goes To Weir

Has Made It Possible To Retain Federal Tree Nurseries

The federal tree nurseries at Indian Head and Sutherland, Saskatchewan, from where trees have been distributed to all provinces, are to be closed. The reason given is that the work is to be carried on by the federal government. This service was cut out of the estimates table a few weeks ago, and would have been completely abandoned on July 31, had the government not reconsidered the matter and reversed its first decision.

Now an additional dollar is to be voted for their operation. Mr. Weir will sit down on other expenses within his department to obtain the funds necessary for the work. The decision, favorable to the services, was reached, following a question put to the government by Hon. W. R. Molesworth—By Grant Dexter.

Probe Wheat Board

Will Investigate Sale Of Gray Wheat Board Of 1917 and 1918

The standing committee on agriculture, in addition to other duties, examine into the documents brought down in the House of Commons recently in connection with the 11-year-old wheat monopoly between Canada and the United States. Hon. J. M. Bennett, Minister of Trade and Commerce, the correspondence deals with Mr. Whistle's complaint respecting the sale by the Canadian government to the United States of the wheat monopoly.

In these letters Mr. Whistle expressed the current belief among the people that the government that gave birth to the wheat monopoly had made a substantial sum of money from the sale of the monopoly.

On a motion of Hon. H. H. Stevens, Minister of Trade and Commerce, authority was given to the agricultural committee to inquire into this

Recipes For This Week

(By Betty Barclay)

Dainty, delicious and healthful desserts do not necessarily call for a great expenditure of money. Here are two inexpensive dishes that will please the most fastidious:

FIG AND RICE CONDE

1/4 cup rice.
1/4 cup milk.
1/4 cup sugar.
1/4 cup lemon salt.
1 egg.

Cook rice, milk, sugar and salt in double boiler over low fire. Remove when rice is tender. Turn into small molds which have been buttered and dredged in sugar. Set away in warm place until firm. Chill. Unmold when ready to serve, with a apricot sauce, garnish with whipped cream topped with a fig.

BREAKFAST COCKTAIL

(Serves 1)

1 egg yolk.
2 dashes of cayenne.
Pinch of salt.

1 teaspoon honey or sugar to taste.

Beat together and drink every morning.

Pernod Balm

Cool and refreshing. Soothing and protective. The perfect aid to beauty. Unrivalled in its softening and beautifying effects on the skin. Imparts a fresh and fragrant charm to the loveliest complexion. Excellent for the skin in all weather conditions. Safeguards the skin and keeps it smooth, soft and flaxen. Always results in the highest expression of beauty.

New Catapult Tested

With a deafening roar of compressed-air motor developing 4,000 horsepower, which were utilized to give a sudden pull on a long tow rope, one of the new naval catapults, weighing planes, weighing almost nine tons, was suddenly hurled into the air in the space of a few yards at Farnborough, England, on April 21. The new catapult will enable long-distance planes, heavily laden with bombs, to rise from small aerodromes or from the decks of naval carriers.

Uniform Signs For Europe

Roadside warning signs in all Europe will be uniform if the countries accept the system adopted at the European Conference on Road Traffic which met at Paris on April 16. The new system will enable long-distance signs, will be triangular, road signs circular, and information signs rectangular. Should all the countries adopt it the change will mean the scrapping of thousands of signs now in use.

Made Interesting Flight

Professor Believes It Will Revolutionize Theories About Stratosphere

The London Daily Express, in a telephone interview with Professor Auguste Piccard, "stratosphere" balloonist, has had as saying that the results of his flight will tend to revolutionize all previous theories concerning the stratosphere.

"The flight proved that the stratosphere is not a desert," Professor Piccard said as having said, "that man with modern technical methods will be able to master its low pressure and its cold."

Recalling from their perilous flight into the upper reaches of the sky, Dr. Auguste Piccard has started compiling his scientific data, while Charles Kipfer, his assistant, took a good long climb to recover their balloon from the glacier in which it had been lost.

Dr. Piccard said, in conversation with Austrian newspapermen, that the stratosphere, which he claims, to have penetralia an altitude of more than 50,000 feet, was the only practicable element for long distance aviation.

"There can be doubt, however," he said, "only if the balloon goes as air tight as our gondola was."

Interviewed at Innsbruck, Austria, from Professor Auguste Piccard said that he and his companion Charles Kipfer suffered greatly from thirst during their balloon flight into the stratosphere.

They were forced to scrape the snow off the roof of the gondola to obtain water. They had to drink the snow, which was the only water available to them.

"The fact that we carried a double supply of oxygen saved our lives," he said. "On landing we found there was left only sufficient for one hour.

A Remedy For Earache.—To have an earache, to endure terrible torture, one can do nothing but seek a doctor, Dr. Thomas' Eclectric drops upon a piece of lint or medicated cotton and placed in the ear will do much in relieving pain.

Believes Jazz Age Dying

Dr. Michael Fitzgerald, who gave the jazz age its name and "discovered" the "flapper," believes that the age of jazz has ended, according to the age of jazz has ended, according to a letter received from him by his publisher, Scholastic Fitzgerald said.

The jazz age lasted ten years from the suppression of the May Day riot in 1919 to the stock market crash in 1929.

The hippopotamus is one of the largest animals, often weighing three or more tons.

Felt Tired Out All Day
Could Not Sleep at Night

Mr. Alphonse Lalonde, 2481 St. James St., Montreal, Quebec, who says his grippe was left very nervous, and felt drowsy and tired out all day, and could not sleep at night, has been taking a new medicine which he says has relieved him of his grippe and that he did not feel at all like working. He was told about Milburn's Heart and Nerve Pills and after trying them he says he is now relieved of my trouble, and can recommend your product to everyone.

Permanent Plan For Livestock Marketing In Britain Is Launched

Brandon, Man.—Livestock producers of Canada today stand at the threshold of a widening avenue of overseas sales, offering possible disposition of 400,000 cattle per year. A gathering of some 1200 cattle stockmen Saturday, June 6, unanimously favored entry into a Canada-wide undertaking to establish a permanent plan for export marketing of live cattle and livestock products.

The meeting, composed mostly of members of the Manitoba Livestock Pool, supported a plan of direct sales to the Canadian Co-operative. This was the majority's stand outlined by S. R. Arkell, superintendent of the Canadian Livestock Co-operative. However, Mr. Arkell's proposal that the present one-man deal be continued for exportation was defeated to cover costs of the new plan was not backed by the gathering, which favored instead a project of bond sales to obtain the extra money.

The proposal is to be placed formally before the Canadian Co-operative bodies for which the Canadian co-operative is the selling agency, namely, Manitoba, Saskatchewan and Alberta Co-Operative Producers; the United Farmers Co-Operative Company, Ltd. (Ontario); Co-Operative Federale de Quebec and the Maritime Livestock Board Inc.

The Co-Operative Wholesale Society of England Mr. Arkell believes will make the Canadian co-operative its sole representative in Canada if the Canadian body is prepared to make the English organization its sole outlet for exports as far as possible in the new areas concerned. The plan would involve direct sale, which Mr. Arkell characterized as a means of gaining a profit commensurate with the cost of production.

While the expression of opinion at Brandon is unofficial and must be ratified at the annual meeting of the Manitoba Livestock Pool in December, it is regarded as the trend of the general trend of opinion in the province, since delegates were present from all Manitoba livestock areas. Local cattle dealers are Pool are to hold meetings this week at which they will be asked to support the new plan and the Saskatchewan Livestock Pool's annual meeting is slated within two weeks.

Already a wholesale society, the Co-Operative Wholesale Society of England, to deliver 75 head of Canadian cattle weekly, has been put into effect, Mr. Arkell announced. He stated that space has already been secured in England and that the English co-operative planned to place its beef in 5,000 butcher shops in a move to encourage demand for the Canadian product.

The New Taxes

Postage Increase Comes Into Effect On July First

Ottawa, Ont.—The new taxes imposed by the Bennett budget come into force on the following dates:

New customs tariff effective midnight, June 1.

Sales tax effective midnight, June 1.

Corporation tax effective on income for 1930.

Income tax effective on 1931 incomes.

Income tax on foreign investments in Canada effective July 1.

Postage increase, July 1.

Postal rate on newspapers, July 1.

Stamp tax effective, July 1.

Insurance policy tax, October 1.

Aviator Killed When Parachute Failed Him

Young Flyer Plunged 2,000 Feet Attempting Ejection Jump

Owen Sound, Ont.—A young aviator who had been parachuting from brewer Chester Beer, 21-year-old student flyer, of Owen Sound, plunged to death at Chelsey, Ont., from a height of 2,000 feet when his parachute failed to open.

Bear had undertaken to make an exhibition parachute jump as a feature event of Chelsey holiday celebrations. This was his first attempt as a parachute jumper. He had been invited to Camp Petawawa and Wainfleet.

The pilot of the plane, L. Wallace, motioned the machine to the required altitude and as he maneuvered the plane to a position to jump, Bear dove into space. He dropped like a plummet, his body crashing through the roof of a woodwork factory.

The youth's body struck with such a terrific impact that his head and spine was severed when he crashed through the building. When picked up the body was mangled almost beyond recognition.

Tariff On Magazines

Wholesale Books and New Government-Saving Belief

Ottawa, Ont.—Thirty delegates representing 75 wholesale houses and 8,000 retailers, holding magazines affected by the recent 10-cent a pound tax, interviewed R. W. Read, federal tax commissioner, seeking relief from the tax which becomes effective July 1.

"We are here to assist the government in arriving at a view as to which publications may be exempt under the new tariff," stated J. Michaels, Edmonton spokesman for the delegation.

It is understood the delegation was told to send in a list of publications they wanted exempted. The government will consider the suggestions.

Passenger Runs Amok

Filipino on C.P.R. Litter Kills Two Of

Tokyo, Japan.—A Filipino steerage passenger stabbed two persons to death and wounded 29 others recently on the Canadian Pacific liner "Empress of Canada" en route from Vancouver, B.C., to Yokohama.

The Filipino, Graciano Bias, 42, ran amok with a scimitar knife, stabbing indiscriminately. He killed Chinese, Chinese boy and Chinese carpenter, members of the crew. The officers of the ship armed with pistols, cornered the killer and placed him in iron for trial at Hong-Kong.

Export Market For Butter

Good Market For Butter and Cheese In Great Britain

Montreal, Quebec—Canada will have a good butter and cheese export business with Great Britain this year, according to a report by Michael C. McLean, Montreal butter and cheese exporter, who has just returned from a visit to Great Britain.

There is a place for Canadian butter in England, he declared, and as the market was not overloaded and as long as Canadian prices and quality were right, he thought that there would be steady sales throughout the 1931 season.

Postponement Expected Of Economic Conference At Ottawa In August

London, England.—It was agreed in Washington circles in London that the Imperial economic conference in August at Ottawa would be postponed. The conference was intended to continue the discussions on Empire economic unity inaugurated at the last Ottawa meeting.

Reasons for belief that postponement would be announced are late as pending general elections in Australia, New Zealand and the dominions. South Africa's "reinforcement" and India's own pending round-table conference and an apparent division of opinion in the British government on the question of wheat quotas.

Under the heading "The Doomed Conference," the Conservative Executive Standard declared the attitude of the Labor Government indicated nothing substantial would come from the imperial economic conference if held here. Ottawa would be left.

The possibility of closer Imperial economic co-operation depends on Britain's willingness to accept a system of tariffs, the need for which was left. The deepest cause of those who control this government rules out the only possible solution and reflects what the discussions there may be at Ottawa to a meaningless exchange of words."

Trade With New Zealand

British Columbia Axioms For Commutation Of New Agreement

Victoria, B.C.—"It is important in the interest of our export trade that a new agreement with New Zealand be concluded in the near future," said G. Brown, chairman of the British Columbia division, said in presenting his report to the convention of the Canadian Manufacturers Association. "New Zealand's action in view of the present situation in Canada, combined with the Canadian budget provision placing a duty on this plate, would hit the canner industry very hard in the future."

Brown's address received the attention of the manufacturers across the Pacific. He was hoping from day to day to see an announcement of the new agreement between Australia and New Zealand, which would continue the present preference on paper, fish and lumber, and extend it on behalf of the British.

Bear had undertaken to make an exhibition parachute jump as a feature event of Chelsey holiday celebrations. This was his first attempt as a parachute jumper. He had been invited to Camp Petawawa and Wainfleet.

The pilot of the plane, L. Wallace, motioned the machine to the required altitude and as he maneuvered the plane to a position to jump, Bear dove into space. He dropped like a plummet, his body crashing through the roof of a woodwork factory.

The youth's body struck with such a terrific impact that his head and spine was severed when he crashed through the building. When picked up the body was mangled almost beyond recognition.

Empress Greeted By Notable Canadians

Governor-General Attends Dinner Given On New C.P.R. Liner

Quebec, Que.—To join with the Prime Minister and many other distinguished citizens of the Dominion in the general welcome which has been extended to "Empress of Canada" on her arrival in Canadian waters, the Governor-General paid a visit to Quebec and attended a dinner.

Serious Problems Now Facing Agriculturists Of The West Considered At Ottawa Meeting

Western Canadian agriculture is drifting into peasant proprietorship, the Canadian Political Science Association, in annual meeting at Ottawa, was told by H. H. Spencer, M.P., in the following, following paper on agricultural problems.

A suggestion that diversified farming for the home market, protected by tariffs, as against specialized products for foreign markets, was not received with approval by western economists who spoke. One Manitoba expert pointed out the water shortage, while others dealt with uncertain economic conditions. It was stated that northern communities were faced with the problem of containing famine thrown on their hands. They did not want to pay in tenant farmers; they were financial, not agriculture, concern.

Mr. Spencer said that only way mixed farming in the west could expand was by guaranteed prices for the products. Butter in the west was now less than 12 cents a pound, eggs 5 cents a dozen.

The future of farm lands was discussed. The farmer, it was said, paid more than his share of taxes; his wages were lowest of all and the only way out for some farmers seemed to be through the bankruptcy court.

C. G. Coote, M.P., said the only way out was a revision of the monetary system. He questioned whether it was wise to have a single government. The banks might have to be given fair play and an equal chance.

Something To Be Proud Of

Booker Washington's School For Negroes Has Proved Wonderful Success

It is just half a century since Booker T. Washington opened his new Negro school in a two-story, double-bunked building in Tuskegee, Alabama, with the aid of \$2,000 voted by the Alabama Legislature. He began with thirty pupils. And the ideal he had in view was to make the treatment of the Negro as a responsible American citizen. Tuskegee has just celebrated this jubilee, and if Mr. Washington could have been on the scene he might well have taken pride in the progress his school has made in its influence. The two-room schoolhouse has grown to a vast institution of some 122 buildings, with an enrollment of over 5,000 students, 1,000 Negroes, who, while they are there, are absolutely secure. Forty trades are taught. Sixteen hundred pupils are accommodated. And in fifty years Tuskegee has proved to the world that the Negro is a man of intelligence and reasonable citizen, if he is given fairplay and an equal chance.

Would Work In Canada

Unemployment Insurance Advertised

By Peter Heenan, Minister of Labour

Unemployment insurance can be worked out to better advantage in Canada than in any other country.

Peter Heenan, M.P., former minister of labor, declared in addressing a service club in Ottawa recently:

"We are already well on the way to adoption of such a scheme," he added.

Under an unemployment insurance scheme, Mr. Heenan asserted, every man participating would have to contribute a small amount, and at the same time receive a small amount.

At present, all men out of work could register. If positions could be found for them, they could be sent to them.

Mr. Heenan said, "If you want a job which has been found for him, he would not be allowed to further participate in the scheme."

His Excellency Lord Bessborough snipping the tape before the doors of Hamilton's new Canadian National Railways Station. After the Governor-General had used the scissars of gold provided for this ceremony, he unlocked the doors with a gold key, and declared the station open.

A Link With the Past

Sojourner Survivor Of Palliser Expedition Of 1858 Is Dead In Manitoba

Peter Erasmus, survivor of the famous Palliser exploration expedition of 1858, probably sole survivor of the historical Red River settlement in Manitoba, which was founded by Lord Selkirk, died at the age of 85, and was one of the most notable citizens as a result of his participation in Alberta's early history-making acts, is dead.

The aged man, extremely infirm and nearly blind in his later years, died recently at Whitefish Lake, near Cold Lake.

Oldest employee on the Canadian civil service list, Peter Erasmus was also a noted as a historian and author. A year ago he was 86. In recognition of his work in training Indian treaties in the early days. He also was an Alberta old-age pensioner.

Erasmus was a resident of Alberta since 1855, and was a member of the Manitoba and Northwest Territories' Legislature.

He was a member of the Manitoba Legislature.

His mother was a Danish woman.

His father was a Dane who had served in the British army, fought at the battle of Waterloo and emigrated to Canada, entering the service of the Hudson's Bay Company.

His mother was a Danish woman.

He was the fourth of six children and as soon as he was old enough to go to a school conducted by the Rev. Mr. West, Anglican minister, who was the first Protestant minister in the settlement.

The Age Of Youth

Great Opportunity For Young Men Says Governor-General

"This is the age of youth," the Earl of Bessborough, Governor-General of Canada, smilingly told graduating students of the University of Manitoba. "You are in the prime of life, and I hope you will not remain at convalescent in the robes of a doctor conferred upon His Excellency a few minutes before by Vice-Chancellor Sir Arthur Currie.

"One of the most remarkable changes in my own lifetime—and my generation has seen a great many changes—is the marked decrease in the average age of holding office. In every walk of life, in every walk of life. In the services in the law, in politics, science and industry, young men and young women can now be found in posts of responsibility that, 30 years ago, were held exclusively by greybeards.

San Marino is the oldest existing republic. It has had 10 centuries of uninterrupted existence.

Crop Yields Count

Correct Methods Of Soil Management Are Essential

"In all branches of farming whether it be stock raising, grain growing, mixed farming, orcharding, or market gardening, the degree of success attained will depend with great certainty on the crop yields obtained. While seasonal factors—rainfall and its distribution, temperature, etc.—have a determinative influence on yields, correct methods of soil management are essential.

"In all branches of straw cultivation in Canada each year aggregated 50,000,000 tons, most of which is wasted. A careful study of the problem of straw cultivation and its use for the manufacture of fuel, alcohol, starch, dextrose, glucose, and other sugars, acids and laquer solvents by means of fermentation, oils, etc., is being made. This includes a study not only of the technical but also of the economic aspects.

Canadian Buffalo For Holland Zoos

Magentic Fair Has Been Slipped From Wainwright To Rotterdam

A magnificent pair of Canadian buffaloes, male and female, from the National Park at Wainwright, Alta., passed through Winnipeg a short time ago en route to the Holland Zoo, via Montreal, via Trois-Rivieres, via the St. Lawrence river route to Rotterdam, Holland, where they will be placed on exhibition in the Rotterdam Zoo. Canadian care was necessary in the transport of these wild creatures, and they were loaded in individual crates in which they will be confined until they reach their destination.

Farmers Buy Bullets

A new outlet in the poultry outlook at the present time, as reported by the Poultry Division of the Department of Agriculture, is the demand by farmers in many parts of

the country for the purchase of

bullets.

The purchase of bullets for

the protection of their flocks

is increasing.

Depressions

Always Pass

Most Optimistic Business Observers Recall Difficulties Of Other Times

The Financial Times says: "Fitter to the panic in 1929, the business optimism came from the younger element in financial and business circles, and the older men—whose names were given up to 1914, and who were called the sad days of 1907, 1903 and 1893—were prone to shake their heads at talk of new era and the disappearance of the business cycle. It speaks volumes for the character of men that they still have remained the chastened younger generation that the voices of prediction were unheeded."

"Under the most hopeful indication that the outlook is better now than it has been for some months, is that these men whose memories and business experience go back to the generalities are now the optimists of the financial community. And as most of them are men of substance as well as experience, their optimism at this moment may be a beacon shining in a dark sky."

It was forgotten in 1929 and 1928 that excessive expansion always has been followed by depression. It is apt to be forgotten now that previous to 1929, the world had succeeded by periods of prosperity. There are various fundamental situations which must be corrected before prosperity can be wholly restored, but the fact is that in the main, the correction is being achieved. In some other quarters the situation may get worse before it is better; yet so long as human consumption goes on a sound basis, the demand for supply must exist, though statistically it is not evident.

Canada has a certain future. There must be faith that the world will continue to prosper. These are the experiments which are disturbing the orthodox will if they are unsound, and, if they are sound, the world will benefit by their success.

We will move on from depression to prosperity as one would step from a dark room into the glare of midafternoon. The process of improvement will be slow, even imperceptible, for a time, but it will be high in the heavens before many realize that there has been a dawn. Thus it has been in the past.

By the time all the trouble is in the past, the world is likely to be in a position to improve conditions and a little faith to the efficacy of sound methods will make the world lighter.

Decline In Dairy Exports

All Items Of Dairy Exports Decreased Since Last Year

With the exception of cheese, which maintained a steady market, exports of all dairy products fell in April. During the past year all items of dairy exports were decreased. The following figures give the value of exports in the 12 months ended April 30, which include the following 12 months in brackets: Cheese, \$2,049,000 (\$4,516,000); fresh milk, \$29,000 (\$681,000); butter, \$836,000 (\$537,000); cheese, \$13,019,000 (\$18,144,000); condensed milk, \$1,329,000 (\$1,722,000), and eggs, \$66,000 (\$42,000).

Agred Car Drivers

According to Mr. Walker, states, professor of experimental psychology at Stanford University, from one-fourth to one-third of persons over three score and ten can shift gears or release the accelerator in the approach of danger just as readily as the average adult. He claims old age is not invariably associated with delayed time reaction, and the aged persons vary among themselves just as do the adults of 30 to 40.

Not Affected By Depression

Unfortunately, depression seems not to have the automobile death rate in the United States. Incomplete information from the several states, compiled by an insurance company, indicate that motor vehicles killed 9 per cent. more persons in the first quarter of 1931 than in the corresponding period of 1930.

Millionaires' Memories

Convenient To Forget Man Who Fights For Existence

George F. Baker, who died the world's second richest man, went apologetically to the window and stared out during the famous "Money Trust" and explained that in telling of his investments and holdings he had completely forgotten a man he disliked.

The members of Congress who heard him gasped. Mr. Baker probably never did understand their amazement that such a sum of money could be overlooked, nor will he be known as "The Man Who Forgot a Million."

There are a great many men in the United States now who could not afford to buy a million dollars worth of gold and as capable of forgetting them.

The last income tax statistics disclosed that 504 persons have annual incomes of more than \$1,000,000 a year, and 3,714 have incomes of more than \$100,000.

Yet with more than they can use or give away, or keep track of and remember, some of these men resist incentives to give money to the poor who would like help, burdened from men who can never forget as much as \$100,000. Some of them fight high wage scales and unemployment insurance that would keep the country and its citizens well and content.

Some of them forget the dreadful significance of 6,000,000 unemployed men as easily as they forgot \$1,000,000. Some forget that the world is in the depression that comes with hunger.—New York World-Telegram.

Modern Literature and Culture

Present Day Literature Offers Abundant Material For Cultivation Of The Mind

Many experienced and broad-minded educators assert that modern languages and literature offer abundant incentives for the cultivation of the character, the fine human sentiments and emotions. The average person never has been able to understand why love of one's fellow, of one's country, of one's race, a devotion to duty and pursuit of noble ideals could not be instilled effectively by modern literatures, philosophies and ethical systems.

The process of dropping of Latin and Greek contributions to commercialism, materialism and raw utilitarianism is arbitrary and gratuitous.

The apprehended coming of a new epoch, not to be confused with the coming of a new age, is the epoch of a bright sunshine and rich supplies of vitamins freely available to men.

Eskimos Become Modernized

Have Gramophones and Motor Boats and Even Automobiles

A hotwater bath in an Eskimo home is one of the curiosities of the modern civilization of the arctic and north, revealed by Rt. Rev. L. O. Stringer, archbishop-elect of Rupert's Land, and for twenty-five years bishop of the Yukon.

The Eskimos today are not backward, Bishop Stringer remarked. The Indian is something of a "born merchant." Eskimos have their motorboats and gramophones.

Something of an opportunist was one Indian who owned an isolated part of the Yukon who saved up enough money to buy an automobile for lake use in winter. It came by boat, however, and the Indian cut a two-mile circle through the woods. One ride around the circle, family included, cost one dollar.

In all his years as an missionary he had not seen an automobile. In fact, he had not even seen a car.

It was the "whites" who followed in the wake of the mission, he said, who made the fight difficult.

Winter Egg Supply

Now Is The Time To Put Eggs Away For Winter Use

This is the time of the year when both the farmer and the housewife makes it desirable for the housewife to "put down" a supply for winter use. Preserved in a solution of either limewater (1 pound to 5 gallons water) or of waterglass (15 cent., i.e. 5 pounds water-glass to 10 gallons water) eggs of the commercial grade "fresh extra" or having an air-cell not over 1/4 inch and weight not over 1/2 oz. per dozen, are usually suitable for all cooking purposes except serving boiled. An earthware crock, small barrel or other suitable receptacle with a capacity of from 10 to 15 gallons for the purpose, and well closed from 20 to 30 days. A crate of eggs put down in lime-water will prove a real economy for winter use. Also, the following scientific method of egg storage in May and June is better in quality than those laid at any other period of the year because of the bright sunshine and rich supplies of vitamins freely available to men.

With Good Intentions

Charles M. Schwab Tells Good Story On Himself

The best story Charles M. Schwab told at the recent meeting of newspaper publishers in New York, was on his part, which also made him make a simple speech. It illustrated the point by telling of a farmer neighbor who wanted to sell him a cow. "I've got a cow I want to sell to you, Charlie," the neighbor said. "Would she fit into my Guernsey herd?"

"I know as much as you would."

"Has she got anything to recommend her?"

"You know as much as she has."

"Does she give lots of milk?"

"No, I can't say as she gives lots of milk, but Charlie, I can tell you she is a good cow, a little good positioned cow and if she's got any milk she'll give it to you."

The Rotation Of The Galaxy

Group Of Stars Massive And Hottest Of All The Stars In The Sky

There has recently been completed the second Dominion Astronomical Observatory, Department of the Interior, Victoria, British Columbia, a determination of the motions of a particular group of stars characterized by being the most massive and the hottest of all the stars in the sky.

It has been found that the stars in this group have a diameter showing that the whole galaxy is rotating around a very distant centre with a speed in the neighbourhood of the sun of about 200 miles a second, but so slowly in its extent that even at this tremendous speed it takes about 230,000,000 years to complete one revolution.

City Surveyor Country.

One man in the City newspaper man can "print all the news that is fit to print" because he does not have to live in close daily association with his victim, as does the country paper man. Another man can "print" because he is fortunate for once up to his ears in a mass of private details and laying them bare to public gaze.

Honesty In London

An incident in a London, England, bus brought to light the fact that passengers had been compelled to sign blanks to passengers who hasn't the exact fare and that the passengers, the company claims, invariably forward, and, amount due. The best you can do is a Paris bus is to offer a passage stamp instead of cash. It will be accepted.

Although hundreds of varieties of batiks are known around the world, only three are commonly known on the American market.

The oldest known batik is recorded in vivid pictures on the wall of an Egyptian temple.

Four commercial air services are maintained in Japan by private companies.

"And, Emma, don't dare wear my clothes while I am away."—Brammer, Berlin.

W. N. U. 1893

Wireworm Menace

By K. M. King and A. P. Arnason, Dominion Entomological Laboratory, Saskatoon

Wireworms cause very heavy losses annually in western Canada, especially in the open prairie areas and in the grain belt of the "wheat country."

Wireworms are not hardy. Bishop Stringer remarked. The Indian is something of a "born merchant." Eskimos have their motorboats and gramophones.

Something of an opportunist was one Indian who saved up enough money to buy an automobile for lake use in winter. It came by boat, however, and the Indian cut a two-mile circle through the woods. One ride around the circle, family included, cost one dollar.

In all his years as an missionary he had not seen an automobile. In fact, he had not even seen a car.

It was the "whites" who followed in the wake of the mission, he said, who made the fight difficult.

Vitamin Potency In Fish

Practically All Richer In This Respect Than Other Foodstuffs

Much has been said and published as to the high vitamin content of cod liver oil. The average fish have probably heard so much about the vitamin content of fish oils generally. As Norwegian scientists have reported, however, the vitamin content of "the various fish species" is exceeded by that of every other product which has hitherto been examined, both in animal and vegetable kingdoms.

Experiments by Dr. E. B. Brooks, now acting Director of the Dominion's Fisheries Experimental Station at Prince Rupert, B.C., showed that commercial pilchard oil, which is produced in large quantities in British Columbia, is a valuable source of vitamin D.

United States chemists have found that tuna and pilchard oils are "as good as, or better than, fish liver oil in vitamin content."

Commercial fish oil is graded as medicinal cod liver oil. Other similar data as to the vitamin in fish might be cited.

Commercial fish vary, of course, at all times, and even after a year and a half, even for the same fish.

During the summerfallow year, cutworms, shallowly as possible, are usually found in the field crops, the means used must be cultural, or otherwise, inexpensive.

Methods of reducing wireworm populations are in the experimental stage, the following can be suggested with considerable confidence as to their value:

(a) Avoid deep plowing or tillage at all times, and as long as possible after the end of June, year after the end of June, year after the end of June.

(b) During the summerfallow year, cultivate shallowly as possible, and mid-July, when the possibility of plow and harrow thoroughly.

(c) Keep fallow entirely free from weeds.

(Note: In years and districts where wireworms are known to be numerous, it is better to keep completely off the fallow during month of August.)

"Dad, what is a boozie?"

"A boozie, my son, is a man who comes to the office too late when I am early, and too early when I am late." — The Passing Show, London.

WORLD HAPPENINGS BRIEFLY TOLD

Scotland is operating its first plant for the production of motor fuels from shale oils.

Despite low world metal prices, British Columbia took more out of its mines in 1930 than in any previous year.

Five hundred patients were transferred to safety when nurses with the Kanagawa hospital at Tokio were partly destroyed by fire.

Automobiles imported into France last year were valued at about \$13,600,000, an increase of 11 per cent over 1929.

A cable received by the Department of Agriculture stated that 465 head of cattle of the "Manchester Brigadier" type were in sharp market at Finchley, England.

The German government has instructed its ambassador in Paris to lodge a strong protest against repeated flights over German territory by French military planes.

More than 100,000 men have won the rank of a full-fledged aristocrat.

The world's export trade for 1930 was about 90 per cent. the size of the 1929 trade.

According to the German trade statistician, Canada occupied seventh place as a source of supply for the rubber footwear imported into Germany in 1930.

Representation of the province of British Columbia on the board of railroads commissioners will receive consideration when the vacancies on the board are being filled.

Collection of an income tax from the United States firms which sell goods to Canada in quantities through any person in Canada, is reported by the Department of Commerce to be causing much concern among those taxed.

Girl Guides Meet

Large Representation Attends Annual Gathering Held This Year In Winnipeg

Nearly every corner of the Dominion of Canada was represented at the annual meeting of the Canadian Council of the Girl Guides' Association held at Winnipeg recently. Fifty delegates from 12 provinces and territories, following which reports, presenting a vivid picture of the Girl Guides' activities, were read.

It was indicated that the movement was rapidly gaining strength.

"We are so glad to see that they are wonderful," Mrs. H. D. Warren, chief commissioner of Girl Guides in Canada, told members of the Women's Guide Council.

"I hear many people say that the modern girl is wild," said Mrs. Warren. "She is not. She is honest and speaks her mind openly and frankly; a thing that is characteristic of girls. The girls of today have in them the making of wonderful citizens."

Paint of a dressless bus has been found in England to make airplanes nearly invisible when flying against clouds or in the rays of searchlights.

Host: "My mother-in-law nearly killed herself to death at your jokes. I hope you will come again soon and stay longer." — Hummel, Hamburg.

A Civic Auditorium

Winning Project To Be Selected Structure To Cost At \$150,000

A civic auditorium with a seating capacity of 9,400, and embracing many special features of interior construction, will be the result of a competition at a cost of \$150,000.

The competition, which is to be held on April 30, is open to all architects, engineers, and kindred spirits attending the competition.

The creation of a Foreign Legion

Memorial For Desert Fighters Unveiled

Honoring Men Who Stuck To Foreign Legion Will Go To Adventurers

Such was the keynote of the impressive celebrations held in Morocco on April 30 in honor of the French Foreign Legion, the most dare-devil and the most discussed regiment in the world.

A memorial, the first stone of which was laid in October last, was unveiled in Vienton barracks to the famous desert fighters and kindred spirits attending the ceremony.

The creation of a Foreign Legion

for service abroad was first sanctioned by a law dated March 9, 1931.

For just as the Legion has provided a refuge for the desperate, the resolute, and the outcast of all nations, Spain, Algeria, Crines, Italy, Mexico, the Sudan, and the Great War, 1914-18, are written on the banner of the Legion.

CHAPTER XIX.—Continued.

"I couldn't get along without you, Uncle Nick. Here's the letter. You'll call me a goose after you've read it. I'll wash away these tears, and I shan't say any more. I promise you I'll come mated before they got away. This one was written a week ago."

"Then we must wait. I—am sorry that Uncle Nick. Hastings knew the state of affairs here."

"I wish it was so," he said. "I have a mind to tell the boy myself, before he went; but I don't one to meddle. Mr. Babbitt is a good man, but Gay knew her own business. She was thinkin' of what was best for Nick, like she always does. Here she comes. Don't let on I been talkin', or that you been cryin' or somethin'."

"She don't cry very often, but she ain't well, and had to come up after her husband."

"Nick's been to see Mr. Babbitt, and he moved toward the stairs. "Nuthin' clears the air like a good cry. 'Tis a thunder storm, and that don't always work, either."

He took the letter in his hands; at sight of Haliday, still talking with the children, he crossed the driveway and joined them by the same pile.

"You got a letter from Jamaica?" he questioned.

"'Viv, no.' Haliday was slightly puzzled at the question. "The fact is, Mr. Babbitt, my wife is the worst correspondent possible. She usually leaves her letters till the last moment."

"She has not written the mail; so I've learned not to worry about it. I don't hear. Did Mrs. Hastings get her letter?"

She nodded assent. "Is he here? Is he here?" she thought looking so this morning.

"She ain't," said Simon. "She's gone to the country. She's been moonin' about what she has, but I don't think she's just plain scared." He lowered his voice, a cautious eye on the children. "She most—well, out when little Nick was born, and—maybe you've noticed there's a certain comin' to him."

"But surely he'll get back as soon as possible. He wouldn't leave her long at a time like that."

"He's knowin' somethin' about it," broke in the old man quickly. "She didn't want he should know till he come back. He hasn't paid up all the bills for his own sickness, and she thought he would and had to give up again at all he knew what was comin' up ahead. That's why she hurried him off; but that's new news now. (Uncle Nick cleared his throat a bit uncomfortably.)

"He hesitated, "she's got a letter to-day, and Nick—well, he's gone off to a cruise in someone's private yacht. Along to you, I thought likely you'd hear about the plan."

"With my wife?"

Haliday was all attention. "Yes," answered Uncle Simon. "He goes up to the islands, I suppose, to see that she's well. Martin's the one that advised him."

"He's made up his mind to come straight home when Mrs. Haliday blew in with an invitation. I take it some friends' o' hers went off to some outlandish places."

Aching

CORNS STOP HURTING

INSTANT RELIEF!

Just a drop or two of Putnam's Corn Extract and the pain disappears. It is almost神奇的! Removing corns with "Putnam's" is so easy, so sure, so painless, so remedy, and the cost is the best. Don't suffer any longer, use Putnam's. Get treated, get instant relief for your corns. Sold at every drug store, 32 cents.

PUTNAM'S

W. N. U. 1893

just the sort o' thing that would tempt a man to do. I'd a mind to read this letter yet, but I gather that he'd ought not lose the chance. He said they'd drop him somewhere along about a month from now, down Cuba way, where he could get back home. What he had to say is, I hope to God he gets here all right. The sooner the better."

His eyes lifted from the yellow ribbon, to Haliday's face; but the younger man had glanced away.

"Did he say whose yacht they were to go on?"

"Gay said it belonged to some old man that was visitin' his wife last summer. I don't know the name."

Haliday looked thoughtful.

"Have they started yet—left Jamaica, I mean?"

"I don't know they must ha' gone yesterday or the day before."

"I see now he couldn't we send a wireless?"

"We don't know the name of the yacht. Gay thinks maybe another will come mated before they got away. This one was written a week ago."

"Then we must wait. I—am sorry that Uncle Nick. Hastings knew the state of affairs here."

"I wish it was so," he said. "I have a mind to tell the boy myself, before he went; but I don't one to meddle. Mr. Babbitt is a good man, but Gay knew her own business. School examinations are now engrossing attention of young folk.

Messrs. J. Rauch and R. Murray made a trip to Burstell, on Monday.

P. Rooney, of Swift Current, Saskatchewan, is the guest today, of W. R. Brodie.

Mrs. Alton arrived in town on Monday night from Red Deer, Alta.

Mrs. C. R. Moore, is entertaining her sister, Mrs. Collins.

Alton Young, of Vandyne, is staying with Mr. and Mrs. A. York, while writing school examinations here.

Mrs. R. Gordon, of Bindloss, is the guest of Mrs. W. P. Pulin, while her son is writing his examinations here.

Rev. Father Leo Sullivan, who has been visiting with a brother at Hardisty, Alta., arrived back on Friday.

Another enjoyable dance is to be held in the theatre on Friday night. Glen's orchestra in attendance. Good music and a good time. Tell your friends.

Mrs. McKinnon, of Regina, arrived on Monday night, on a visit with her daughter, Mrs. Lacey.

Mrs. N. Chell and children, left on Tuesday, for Leduc, Alta., on a visit to the home of her parents there.

Geo. Shannan arrived in town from a business visit to the east the first of the week. He reports that agricultural conditions look good near Ottawa.

An aero plane arrived in town on Tuesday and made passenger flights. A little business was gleaned, but not any large amount.

Summer Round-up

In many places they have had a summer round up of the children who are to start school for the first time in the autumn.

The idea of the round-up is to have the children medically examined. Those who, at that time are found to be in need of medical care are sent to their doctor and their dentist for treatment, in order that when they start school in the autumn they will be physically fit.

Parents should not wait until the child is ready to go to school to have this done. However, if they have neglected to do this point, it is better to attend to it now than to wait until school opens.

One of the commonest and most serious mistakes that parents make is to allow an abnormal condition to persist with the idea that the child will grow out of it, or that it is too young to have treatment.

The child who cannot see without glasses is obviously handicapped until he has been fitted with proper glasses. Those who have a runny ear are almost equally in a way to deafness, which is a permanent handicap unless the ear is properly treated. Children do not grow out of such conditions.

Not only are diseased tonsils and teeth a handicap to the child, but they are dangerous in that they poison the body and, if it is believed, very often the cause of heart and kidney disease in later life.

No child should be handicapped by conditions which can be corrected by proper treatment.

At Ottawa--cont.

Alberta coal to reach Manitoba and Ontario. Members soon lose interest in the debates and at times the attendance is very small. Most of the members from Ontario go home for the week end and are away both on Friday and Monday.

There is much more French spoken in the house this year than usual, and nearly all the officers and employees are French.

Sincerely
F. W. Gershaw.

Toronto's mayor recently asked the city's business men and firms to give no printing jobs to printers outside of Toronto. When solicited for a printing job by an outside salesman, he as loyal to your home town as Toronto's mayor.

School Holiday Specials

New Lakeside Inn is Opened

Beautifully set in one of the most picturesque sections of North America, the New Lakeside Inn is the ideal place to bring in fact into the life of Digby and Kentville, the new Lakeside Inn, at Yarmouth, N.S., which is the most direct and the newest link in the Canadian Pacific Railway's great chain of hotel and tourist facilities. Readily accessible from Saint John, through Digby, via the

luxurious steamer "Princess Helena"; from Halifax, over the Atlantic; from Boston and direct from New York. Built by the Canadian Pacific Railway, and its new hotel is destined to play an important role in tourist traffic. Not only will it be a great addition to the famous Annapolis Valley, and its famous Baddeck, but also to the great and popular sports centers of the Maritimes.

Excursions are only a few of the offerings. There is good golf available near Yarmouth and Digby, and courses form a comfortable base of operations. Tents and caravans have been skillfully constructed in the spacious grounds, broad verandahs and airy bedrooms. Its cuisine and service are conducted on the highest standards, known to guests of the company throughout Canada.

Cutworm Indicator Strips

During the very early spring before any crops had been sown this year an attempt was made to get farmers in the pale western cutworm areas to sow one or two strips of grain diagonally across their fields to determine whether or not cutworms were present before sowing the entire field. This measure was advocated to prevent the sowing of large acreages which were so heavily infested with cutworms of this species as to make the growing of a crop impossible.

In some districts this advice was ignored, but in others individual farmers tried the "indicator strip." In most cases these strips showed marked injury by the end of the first week of May and in such fields no further sowing was done. Neighbors who did not use the indicator strip lost their crops which meant a loss of seed and labor.

In view of the agitation which was started during the fall and winter regarding some method of determining which fields to sown eggs, the brief review of the work is given as a guide to next season since at present it appears as though there will be continued trouble next year from the pale western cutworm.

The majority of those farmers who used the "indicator strip" are given a true index of cutworm conditions in the field. They also gained a decided delay was more than repaid by the advantage gained in sowing "safe" fields. They realize that the early spring season if more favorable for crop growth the indicator strip would have been an invaluable guide in the successful production of crops this year.

only patchy. If the strips are sown the first thing in the spring, as soon as the driller possibly is taken into the field, the information concerning the presence or absence of cutworms can be obtained in ample time to seed wheat.

The use of the "indicator strip" will keep in mind for next season as it is quite possible that the pale western cutworm will be worse next season than this--H. L. Seaman, Dom. Entomologist, Lethbridge, Alta.
